

NOW IS **NOT** THE TIME TO KICK **A FIELD GOAL** ON TRADE

We've fallen behind, and the clock has been ticking. The Korea Free Trade Agreement (FTA) represents an enormous opportunity to regain the momentum. The question is are we satisfied with opening just one export market? Or do we seize the moment?

For Caterpillar, passing the Korea FTA while keeping Colombia and Panama on the sidelines is like kicking a field goal on second down.

Congress needs to pass the Colombia, Panama, and Korea FTAs early in 2011. At the same time, we need to get serious about completing the WTO Doha Development Agenda and the Trans Pacific Partnership Agreement.

The "time out" on trade is over. Let's score some touchdowns for the American worker.

PASS THE COLOMBIA, PANAMA AND KOREA FTAs.
